

Current Environmental Issues

- Life Cycle Assessment data for timber products
 - Comparison with other materials
- Durability & maintenance of timber products
 - Impact on whole life costing
- End of life
 - Recyclability
 - Disposal methods
 - New products from waste

Timber Frame Buildings

- Thermal efficiency
- Thermal mass vs insulation & good design
- Impact of flood
- Fire safety

For the Future

- New generation of composites
- Advanced wood processing technologies
- New manufacturing technologies
- Tailored wood supply
